UNCONVENTIONAL SHAPE  
AND AVANT-GARDE STYLE**

UNICA

ELECTRONIC  
SCALE

# UNICA

What makes the difference are the modern lines combined with some vintage details, a large and bright display and a large keyboard with fluid lines characterized by a highly sensitive membrane capable of resisting water, flour, earth and any other external agent. The metal structure, the feet inspired by the legendary 60s blend with the modernity of ITALIANA MACCHI's technical solutions, creating a complete product suitable for any type of market.

A product intended to satisfy the main needs of the market, to enrich each department with style and imagination, satisfying every taste and need with a unique approach.

## PRINTER

The proven Custom printer, with easy loading, for those who don't have time to change the roll and want convenience and speed.

## DISPLAY

Even more innovative in size but above all in brightness and contrast, the LED backlit LCD viewer of the entire UNICA range.

## KEYBOARD

Large high sensitivity membrane keyboard, protected by water, flour, earth and any other external agent, with 34 direct PLU, it is the standard keyboard of UNICA scales.

Another possible solution will be the version with the traditional mechanical keyboard.

## CONNECTABILITY

Up to 6 scales that can be connected to the network thanks to the NET version allow UNICA to create a small service network. Wireless connection is also available as an accessory to the standard scale. Management of the programming of the scales possible through the application software inserted in PC Suite.
